5. Heap Sort is an unstable. Give an example of an input list in which the order of records with equal keys is not preserved.

	A	B	C	D	E	
	100	90	88	88	60	(in Maxheap)

After sorted

=> E, D, C, B, A

60, 88, 88, 90, 100

=> should be C -> D

thus it's unstable.
